

COMMON GOAL

Example of a goal: To identify the 10 most popular dog names in our community

Note: The goal may vary depending on what the class decides to work on and the scope of the project. Think of the project as a way to promote awareness of Mutt-i-grees®.

Examples of objectives/steps:

1. Select project coordinator
2. Decide how we would get the data (the names of pets)
3. Who would be assigned to collect the names?
4. Who would compile and analyze the data?
5. Once we identify the most popular names, what's next?
(Advertise in the newspaper and on television, have a press conference to announce the results...)

What is the specific accomplishment/goal we want to achieve as a class?

What is the desired outcome? How will we know we reached our goal?

What is the timeline for accomplishing the goal?

What is our first step?

What are our objectives – the steps necessary to achieve the goal?

Who will be responsible for achieving each of the objectives?

When/how often will we meet to discuss progress?
